PUBLIC NOTICE
SPACEX ACTIVITY AND DEBRIS HOTLINE

On Tuesday, March 30, 2021, SpaceX completed a flight test of its Starship test vehicle serial number 11 (SN11) prototype near Boca Chica Beach. During the landing maneuver, the test vehicle experienced a rapid unscheduled disassembly (also known as a RUD) and was lost. As a result, debris has been found in the surrounding areas, including the Laguna Madre Bay.

If you come across any debris, please do not attempt to handle. As part of its standard recovery efforts, SpaceX has made available a hotline and email address for the public to report found materials: 1-866-623-0234 or email recovery@spacex.com.
