### ATTENTION RV GUESTS

ISLA BLANCA PARK, ANDY BOWIE PARK AND ADOLPH THOMAE, JR. PARK  
POTENTIAL TROPICAL STORM DEVELOPMENT

June 17, 2024

Dear RV Guests,

The National Weather Service is currently monitoring an area of low pressure moving across the Yucatan Peninsula and into the Bay of Campeche. As with all tropical systems this time of year, there is always the possibility for rapid intensification. Currently, forecast models show the system making landfall on Wednesday as a tropical wave, well to the south of Brownsville. If the forecast holds true, it will result in much anticipated rainfall for our area, with brief heavy downpours, high tides and some high winds.

As a precautionary measure, we are asking all campers to secure loose items around your campsites (e.g. chairs, umbrellas, tables, carpets, shade canopies, etc.) that could easily be tossed by high winds and cause damage to neighboring property. You may also want to retract awnings and re-check tie downs to make sure campers are properly secured. Please stay tuned to your local weather station for the latest developments. Be sure to have a plan of action, in the event the system track changes or intensifies.

The Parks Department will continually monitor the system and keep campers apprised of any changes via the Park's Facebook page and website. Should you have any questions regarding this notice, please do not hesitate to contact our office.

Sincerely,

A handwritten signature in blue ink, appearing to read "Joe E. Vega".

Joe E. Vega  
Parks Director
