If more than one remedy for a default by the Company may be applicable, the County may pursue such jointly or alternatively as it may elect and the forbearance by the County to enforce any remedy provided above upon an event of default shall not be deemed or construed to constitute a waiver of such default.

**Road Use Agreement**

## **ROAD USE AGREEMENT**

This **ROAD USE AGREEMENT** (this "Agreement") is made and entered into this 11<sup>th</sup> day of September, 2018 by and between Cameron County, a Texas County (the "County"), and Palmas Wind, LLC, a Delaware limited liability company ("Developer"). Developer and the County are sometimes referred to herein individually as a "Party" and collectively as the "Parties." The term "Developer's Representative(s)" shall include the Developer's contractors, subcontractors, agents, employees, suppliers and designees.

### **WITNESSETH:**

**WHEREAS**, Developer intends to develop a wind-powered electric energy generating facility (the "Project") in the County; and

**WHEREAS**, Developer has provided to County a preliminary site layout plan for the Project that shows the turbine sites, the access road entrances, the underground collection system and the substation site, the locations of which may change in the sole discretion of the Developer, a copy of which is attached as **Exhibit "A"** hereto (the "Plan"); and

**WHEREAS**, in connection with the construction, operation and maintenance of the Project, the Parties desire to address certain issues relating to Developer's proposed use of roads within the County operated and/or maintained by and/or dedicated to the County, including the rights of way therefor (collectively, the "County Roads"); and

**WHEREAS**, by the ownership, operation, maintenance and/or dedication of the County Roads by or in favor of the County, the Commissioners Court of Cameron County, Texas has the authority on behalf of the County to permit Developer's activities on the County Roads, as herein described; and

**WHEREAS**, Developer and the County wish to set forth their understanding and agreement as to the road issues relating to the construction and operation of the Project.

**NOW, THEREFORE**, in consideration of the mutual promises and covenants herein set forth, the parties, intending to be legally bound, agree as follows:

Section 1. **Road Use; Repair and Improvements.**

(a) **Authorization to Use County Roads.** Developer and its successors and assigns, during the planning and construction phases of the Project and thereafter during the operation phase of the Project until the Project is completely abandoned, shall have permission to use:

(i) those certain County Roads identified on the Plan (specifically, Olmito North Road and Fernando East Road), including the rights of way therefor (the "Impacted Roads"), for access to the Project, egress from the Project, and the installation, maintenance, repair and operation of Project facilities, including but not limited to the Project

facilities depicted on the Plan, including crossings of the said Impacted Roads with Project transmission lines and collection lines connecting the Project to the electrical power grid system and including the crane walk of Olmito North Road and the ability to trench across Olmito North Road.

Developer may, in any case, make minor deviations and adjustments to the final siting of Project facilities as reasonably necessitated by concealed conditions or other construction or engineering considerations or requirements. The permission granted in this Section 1(a) includes an authorization to upgrade such roads and/or to install curb cuts and/or turn radii where necessary and conduct geotechnical and other preliminary construction analysis of such roads. Notwithstanding the foregoing, Developer shall not permit the encroachment of the Project's wind energy generating turbines, including the aerial overhang from such turbines, into the rights of way of any Impacted Roads which are as of the date of this Agreement open for vehicular traffic by the public, nor shall any other encroachment be permitted under this Section 1(a) that unreasonably interferes with vehicular traffic upon the Impacted Roads.

(b) Temporary Road Improvements. The Parties acknowledge and agree that Developer shall have the right on Impacted Roads: (i) to make temporary modifications to Impacted Roads as needed for the Project, such as the widening and reinforcement of roadways and road shoulders, and modification to culverts, bridges, driveways and other similar or related fixtures; and (ii) to construct temporary roads and driveways (including, but not limited to certain culverts, bridges, road shoulders and other similar or related fixtures) to permit materials and equipment to pass (the "Temporary Road Improvements"). Developer shall notify the County of any Temporary Improvements prior to commencement of construction of the Temporary Improvements.

(c) Permanent Road Improvements. If Developer elects to proceed with the Project, then, with Commissioners Court's prior approval, Developer has permission to design, engineer, permit and construct all road upgrades and/or improvements generally described in Exhibit "B" attached hereto (the "Permanent Road Improvements"), and in accordance with the stamped engineering drawing which is attached as Exhibit "C" (the "Engineering Drawing"). Developer shall have any and all designs for Permanent Road Improvements approved by the County Engineer and shall notify the County at least ten (10) days prior to commencement of construction of the Permanent Road Improvements. The cost of the Permanent Road Improvements will be paid by Developer. Developer shall provide to County the as-built engineering drawings of all Permanent Road Improvements within sixty (60) days of completion of construction of the Project. After Permanent Road Improvements have been installed and the construction of the Project is complete, Developer shall, on a one-time basis, restore the Permanent Road Improvements to their condition as originally improved by Developer pursuant to this Section; provided that if anyone other than Developer or its subcontractors causes damage to the Permanent Road Improvements, Developer shall not be responsible for the restoration of any such damage. After Permanent Road Improvements have been installed, County shall incorporate the Permanent Road Improvements in any future road improvement, new road construction, or road removal plans that may affect travel within the boundaries of the Project as not to restrict, prevent, or otherwise infringe upon the Developer's ability to travel throughout the Project.

(d) Project Traffic; Repairs. The Parties recognize that traffic related to the Project may use County Roads other than the Impacted Roads. In the event Developer or Developer Representatives travel over a County Road, without a permit, with a load exceeding the weight limits in effect on the date hereof, and such travel damages such County Road, Developer shall promptly notify the County to request inspection by the County. The County agrees to inspect the damaged County Road within 5 business days of such notification. Within fifteen business days of inspection of the damaged County Road, the County will provide Developer with a written damage assessment and cost estimate. Developer agrees to reimburse the County for repair of damages that the Parties agree was actually caused by such travel; provided that the costs and expenses associated with the labor and materials that the County uses to perform such repair are substantially consistent with market costs in the County for such labor and materials; and provided further that Developer will only be responsible for costs and expenses relating to repairing such County Roads in a condition substantially similar to their condition immediately prior to such damage. The County shall provide Developer with invoices for all labor and material costs for repairs due to incidental use as described in this Section 1(d).

(e) Maintenance of the Impacted Roads. The Parties acknowledge and agree that Developer shall have no obligation to upgrade, maintain or repair the Impacted Roads except for (i) activities associated with Permanent Road Improvements set forth under Section 1(c) or (ii) damage caused to any Impacted Roads by Developer, in which instance, Developer shall repair such Impacted Roads to a state that is equal to or better than the original condition of such Impacted Road prior to its use by Developer.

(f) Dust Suppression. The Parties acknowledge and agree that Developer shall have the right on Impacted Roads to utilize either water or magnesium chloride, at Developer's election, for dust suppression on such Impacted Roads.

(g) Further Authorization. The County acknowledges that from time to time during the development of the Project, Developer's transportation plans may change and travel over County Roads with loads exceeding the weight limit set by the County may be required. The County agrees that in such event, it shall not unreasonably deny any permit application filed by Developer in connection with such travel. To the extent any additional permit is required on a County Road that is not already an Impacted Road hereunder, and the County grants such permit over such County Road, this Agreement shall automatically be amended to include such County Road as an Impacted Road hereunder.

Section 2. Limitations of Liability. In no event shall Developer or Developer's Representatives or any of their respective members, officers, directors or employees or the County or any of its elected or appointed officials, officers or employees be liable (in contract or in tort, involving negligence, strict liability, or otherwise) to the other party or their contractors, suppliers, employees, members and shareholders for indirect, incidental, consequential or punitive damages resulting from the performance, non-performance or delay in performance under this Agreement.

Section 3. Miscellaneous.

(a) Road Documentation Disputes. The County and the Developer shall have the right, but not the obligation, to photograph or otherwise, document the condition of the Impacted Roads, as well as any other County Roads prior to commencement of construction of the Project and following completion of construction of the Project. In the event there is a dispute with respect to the amount of damage to the Impacted Roads and/or other County Roads resulting from construction of the Project, the Parties will first look to such photographs or other documentation if it exists. If the Parties are unable to resolve such dispute by looking at such photos or other documentation, or if such photos or other documentation do not exist, the Parties will conduct an on-site inspection with a professional engineer reasonably acceptable to the Parties, who is registered as a professional engineer in the State of Texas and knowledgeable and experienced in county road design and maintenance, to determine the amount of damage to the Impacted Roads and/or the other County Roads, if any, that was caused by construction of the Project.

(b) Remedies and Enforcement. Each of the parties hereto covenant and agree that in the event of default of any of the terms, provisions or conditions of this Agreement by any party (the "Defaulting Party"), which default is not caused by the party seeking to enforce said provisions (the "Non-Defaulting Party") and after notice and a 30-day cure period has been provided to the Defaulting Party, then in such an event, the Non-Defaulting Party shall have the right of specific performance, mandamus and/or injunctive relief. The foregoing shall be the exclusive remedies available for the enforcement of this Agreement.

(c) Due Authorization. Developer hereby represents and warrants that this Agreement has been duly authorized, executed and delivered on behalf of Developer. The County hereby represents and warrants that this Agreement has been duly authorized, executed and delivered on behalf of the County.

(d) Severability. If any provision of this Agreement is held invalid under any applicable law, such invalidity shall not affect any other provision of this Agreement that can be given effect without the invalid provision and, to this end, the provisions hereof are severable.

(e) Amendments. No amendment or modification to this Agreement or waiver of a Party's rights hereunder shall be binding unless it shall be in writing and signed by the Party against whom enforcement is sought.

(f) Notices. All notice shall be in writing and sent (including via facsimile transmission) to the parties hereto at their respective addresses or fax numbers (or to such other address or fax number as any such party shall designate in writing to the other parties from time to time).

estoppel certificates (certifying as to such matters as may reasonably be requested, including, without limitation, that this Agreement is unmodified and in full force and effect (or modified and stating the modifications) and that there are no defaults existing (or that defaults exist and stating the nature of such defaults)) and/or consents to assignment (whether or not such consent is actually required).

(i) Counterparts. This Agreement may be executed in any number of counterparts, each of which shall be deemed an original, with the same effect as if the signatures thereto and hereto were upon the instrument. Delivery of an executed counterpart of a signature page to this Agreement by telecopy shall be as effective as delivery of a manually signed counterpart to this Agreement.

(j) Governing Law. This Agreement shall be governed by and interpreted in accordance with the laws of the state of Texas, irrespective of any conflict of laws provisions.

(k) Zoning and Permitting Acknowledgement. County acknowledges that building permits for the Project's wind turbines, substation and operations and maintenance building will be required to be obtained from County by Developer for the Project. In addition, County rules or orders will require Developer to receive a site development and utility permit. Other than as set forth in this Section 3(k), there are no County rules or ordinances that would require Developer to seek zoning approval, a permit, or an authorization for the construction and operation of a wind energy project and there are no County rules or ordinances regarding decommissioning, safety buffer zones, set back requirements, noise restrictions, shade, flicker, shadow or visibility restrictions, or other zoning rules or regulations affecting the proposed construction and operation of Project improvements.

(l) Successors and Assigns. This Agreement shall inure to the benefit of and shall be binding upon the Parties hereto, their respective successors, assignees and legal representatives.

*[Signature page immediately follows]*

IN WITNESS WHEREOF, the parties hereto have executed this Agreement the day and year first written above.
